## **Documentation of the Application**

### Instructions on how to build and run the application:

1. Double click on **main.py**
2. Refer to the game guide found in the main menu.

--or--

1. Open a terminal and go to the directory containing the application files.
2. Run **main.py**.

(This way, you can see error messages that would cause the program to not work properly if there are any.)

3. Refer to the game guide found in the main menu.

### Minimum Requirements and Dependencies:

This application runs on 32-bit Python 2.7 and 32-bit Pygame 1.9.2a0. Players should be connected through a network to be able to play with each other.

Pyganim was also used for the animations, but the module, with some alterations, is already included in the application folder.
